Subject: CLOSE HOLD: next steps on EtO facilities

ADDs,

Attached are two documents. Both are close hold, please do not share.

1. Draft list of facilities for discussion on Wednesday's special purpose call.
2. ATSDR letter mentioned by Region 5 on the last EtO call. Below some contextual information:
In June, after conducting modeling and monitoring around an ethylene oxide source (Sterigenics) in the suburbs of Chicago, Region 5 requested that ATSDR review the results and specifically answer the question: If modeled and measured EtO concentrations represent long-term conditions, would they pose a public health problem for people living and working in Willowbrook?

ATSDR's assessment of that question is provided in the attached letter consult. Please keep it close hold. Note their findings and recommendations are specific to the Sterigenics facility in Willowbrook, Illinois.
